FN2 CIVIC-R Muffler System

Prototype shown

CIVIC-R FN2 K20Z Muffler System Price 108,000 yen 18000-FN2-000

After receiving countless requests about which muffler is best, when used in conjunction with Toda Racing parts in producing the most power. There is only one answer, Toda Racings High Power Muffler.

※ The design is based on the FN2 CIVIC-R (British specification made in September, 2007).

■ Right & Left rear tail pipes with performance chambers.

Equipped with resonator in each tail pipe to give more sporty sounds.

■ Stainless steel & straight diameter system

The internal design is based around a constant $\phi 60$ pipe, with no bends or restrictions the engine is able to breath more freely so releasing more power. Releasing the true potential of TODA Racing performance parts.

■ 5piece design

Handling easier due to compact 5 piece design.

(Stainless) Center pipe $\phi 60$ mm + Rear pipe $\phi 50$ mm $\times 2$ + End-chambers for both side.
